

I fully support the language, intent, and spirit of RM-10582. The amateur vanity program as it currently exists allowing individuals to file multiple applications for a particular callsign has essentially turned the process into a system that provides the wealthy with an unfair advantage. This goes against the goals of equal access to all which our government often cites as a goal of it's services. I support RM-10582 as it intends to serve all amateurs, not just those with the most money. Thank you for allowing me to comment on this issue.
